### **DESKTOP REVIEW OF ECOLOG ERIS RECORD SEARCH FOR FOUR PROPERTIES IDENTIFIED AS SITE 1, SITE 4, SITE 5, AND SITE 8 LOCATED IN THE CITY OF NIAGARA FALLS, ONTARIO**

## Background

Golder Associates Ltd. (Golder) has prepared this Technical Memorandum for the Regional Municipality of Niagara Falls (Niagara Region). The Technical Memorandum summarizes the desktop review of the search of records of federal, provincial and private sector databases by EcoLog Environmental Risk Information Services Ltd. (EcoLog ERIS) for Sites of Interest 1, 4, 5, and 8 in support of the Niagara Falls Waste Water Solution Schedule 'C' Municipal Class EA Project (the Project). The Scope of Work was described in a communication from Golder to Niagara Region, dated January 8, 2020, and focussed on an assessment of the records to identify potential current or historical contamination within or in the vicinity of the Sites of Interest. The work was conducted in January and February 2020.

## Scope and Review of Environmental Databases

Golder contracted EcoLog ERIS to search available federal, provincial, and private-sector environmental databases for the Sites of Interest 1, 4, 5, and 8 and the surrounding properties within a radius of 500 metres (m). The complete database reports are included in Appendix A. Noteworthy findings of the EcoLog ERIS reports are summarized in the following sections. The boundaries and the on-Site and off-Site Potentially Contaminating Activities (PCAs) associated with the Sites of Interest are identified on Figure 1. #### **Summary Comments:**

Based on the information obtained as part of this ERIS desktop review, parts of Sites of Interest 1, 4, and 5 had a history of commercial, industrial, or waste management uses. Only Site of Interest 8 had no history of on-site commercial, industrial, or waste management uses. Although there were a range of commercial, industrial and waste management activities on properties in the vicinity of the Sites of Interest, no explicit documentation of contamination events on the neighbouring properties that may have affected the environmental condition of soil and groundwater on the Sites of Interest was found. It is a reasonable expectation, however, that the potential influence of neighbouring properties be evaluated in further detail if further investigation of specific Sites of Interest is implemented.

The PCAs that were identified for the Sites of Interest and surrounding properties included:

- PCA (#28): Gasoline and Associated Product Storage in Fixed Tanks – Based on the EcoLog ERIS reports, Site 4 has a record of one commercial storage fuel tank; Site 5 was listed as a retail fuel outlet; and the property located at 8320 Oakwood Drive, approximately midway between Sites 4 and 5, was listed to have two expired storage fuel tanks.
- PCA (#58): Waste Disposal and Waste Management– Site 1(8800 Garner Road) was identified as a waste disposal site in 2008, 2013, and 2018.

- Waste Generator Summary – Several waste generators were identified for the Sites and the surrounding properties for one or more of the following wastes: paint/pigment/coating residues, waste oil and lubricants, waste crankcase oils and lubricants, aliphatic solvents, petroleum distillates, acid waste-other metals, light fuels, and organic laboratory chemicals. The volumes wastes and the locations where these were managed on the Sites of Interest and neighbouring properties were not indicated; these would require further assessment in future investigations.

**Investigation 2:**  
**Penalty Imposed:** Harvey Ambrose was convicted of one offence under the Environmental Protection Act (EPA), was fined \$12,500 plus a victim fine surcharge of \$3,125 and was given one year to pay the fine.  
**Description:** The conviction relates to failing to comply with the terms and conditions of a Provisional Certificate of Approval (C of A).

**Location:** Welland  
**Region:**  
**Ministry District:**

**Background:**

Harvey Robert Ambrose is listed as the sole director for the company Power Grow Systems Inc., located on Garner Road in Niagara Falls.

The site is governed by a Provisional Certificate of Approval (C of A), which set out conditions for use of the site, including limits to the amount of wood waste that can be on site to a maximum of 1,000 tonnes at any time.

On April 15, 2015 ministry staff executed a routine inspection and estimated that the wood waste was in excess of the tonnage limits. Further information was subsequently provided to the ministry by Power Grow employees which indicated that the amount of wood waste was well in excess of the 1,000 tonne limit in the C of A.

On August 11, 2015, ministry staff returned to the site and learned that there was 4,230 tonnes of wood waste on site, that had accumulated starting on April 8, 2015 and ending on May 26, 2015.

Subsequently, the matter was referred to the Ministry's Investigation and Enforcement Branch. Following an investigation, the defendant was charged.
