ADDENDUM # 2

Questions & Answers

- Q1: Appendix "B" Spec. # 99G-1, Specification # 4 – Body - page 3 of 13: Please clarify that pruner compartment has two storage areas: Lower area approx. 12"wx24"hx12'l, upper area approx. 12"wx30"hx12'l. Is the compartment intended to be approximately 54" tall inside body?
- A1: The internal dimensions of the compartment are 12"W x 30"H x 12'L. With the shelf at 24" height the upper portion of the compartment would measure 12"W x 6"H x 12'L with a lower compartment measuring approximately 12"W x 23"H x 12'L (depending on shelf thickness). HOWEVER; upon review the compartment width should actually read 14" in lieu of 12".**
- Q2: Appendix "B" Spec. # 99G-1, Specification # 5 – Tailgate - page 3 of 13: Will fabricated strap hinges with stainless steel inserts to eliminate wear be accepted in lieu of cast hinges??
- A2: Yes, fabricated strap hinges would be acceptable as long as they're fully serviceable with included grease fittings.**
- Q3: Appendix "B" Spec. # 99G-1, Specification #11 – Hydraulic Hoist - page 9 of 13: Will a Nordic C90 or DH90 hoist be acceptable as an alternate to the Venco hoist?
- A3: A Nordic hoist would be considered as acceptable equivalent as long as all other requirements are met under the hydraulics section of the specs.**

This Addendum must be acknowledged in the space provided on the Form of Quotation.

All other terms and conditions remain unchanged.
