

Niagara Approved Product and Equipment List

DISCLAIMER: Inclusion onto the Approved Product and Equipment List (APEL) does not constitute mandatory use of the product in the Region’s contract documents. The approved manufacturer(s) on the APEL must meet the specifications as outlined in Niagara Region’s tender or quotation. Products are not necessarily listed in preferential order. Niagara Region reserves the right to list manufacturer(s) for specialized equipment and applications outside the APEL in tender or quotation specifications. All materials used in the alteration or operation of a Niagara Region drinking water system that come into contact with water within the system must meet all applicable standards set by both the American Water Works Association (“AWWA”) and the American National Standards Institute (“ANSI”) including NSF 61 and NSF 372.
