Order No:

Program assistant initials:

All vaccine orders require:

- A copy of your current 4 week fridge temperature log (up to present day)
- 3 full business days to fill the order

Facility name: Phone: Ext.:

Contact: Date (mm/dd/yyyy):

Email:

All vaccine orders will be delivered to your facility according to the [vaccine delivery schedule](https://www.ontario.ca/files/2024-01/moh-publicly-funded-immunization-schedule-en-2024-01-23.pdf) (niagararegion.ca/health/professionals/vaccine/vaccine-schedule.aspx).

High Risk Client(s) ONLY

Order high risk vaccine(s) according to the High Risk Vaccine Programs as outlined in the most recent [Publicly Funded Immunization Schedules for Ontario](https://www.ontario.ca/files/2024-01/moh-publicly-funded-immunization-schedule-en-2024-01-23.pdf) (https://www.ontario.ca/files/2024-01/moh-publicly-funded-immunization-schedule-en-2024-01-23.pdf).

Vaccine	Indicate reason as per the Publicly Funded Immunization Schedule	Date of birth (yyyy/mm/dd)	Doses requested
Hepatitis A (Adult)			
Hepatitis A (Pediatric)			
Hepatitis B (Adult)			
Hepatitis B (Pediatric)			
Hepatitis B Renal (Adult)			

Vaccine	Indicate reason as per the Publicly Funded Immunization Schedule	Date of birth (yyyy/mm/dd)	Doses requested
Hib (Haemophilus influenzae type b)			
Meningococcal B for those aged 2 months - 17 years (individuals born in 2002, 2003, 2004, 2005 and 2006 are eligible for missed doses until Dec. 31, 2024)			
Meningococcal Conjugate ACYW-135 for those aged 9 months - 55 years [◇] (individuals born in 1964, 1965, 1966, 1967 and 1968 are eligible for missed doses until Dec. 31, 2024) [†]			
HPV-9 (Human papillomavirus) for males 9-26 years of age (males born in 1993, 1994, 1995, 1996 and 1997 are eligible for missed doses until Dec. 31, 2024)			

[◇] Ontario publicly funds a single lifetime dose of Men-C-ACYW135 for individuals ≥56 years of age who meet high risk eligibility criteria listed in Table 3 (High Risk Vaccine Programs) of the Publicly Funded Immunization Schedules for Ontario.

[†] Under the program extension high risk individuals born in 1964, 1965 and 1966 are eligible for two doses of Men-C-ACYW135, since they would have been 55 years of age in 2020, 2021 and 2022, respectively. Administration of two doses in these cohorts aligns with the National Advisory Committee on Immunization recommendations based on expert opinion as the product monographs limits age indication to 55 years of age.

Additional Information

Pneumococcal Conjugate - Use your current Prevnar[®]13 inventory for those individuals 50 years of age and older who meet the high risk criteria as per the most recent Publicly Funded Immunization Schedules for Ontario.

Clients finishing their HPV-4 series with HPV-9 should be informed that the protection against the additional 5 strains that HPV-9 covers cannot be confirmed. Studies using a mixed regimen (interchangeability) of HPV vaccines were not performed for HPV-9.
