NOTICE OF CLASS ENVIRONMENTAL ASSESSMENT

Pelham Elevated Tank Municipal Class Environmental Assessment and Enhanced Conceptual Design

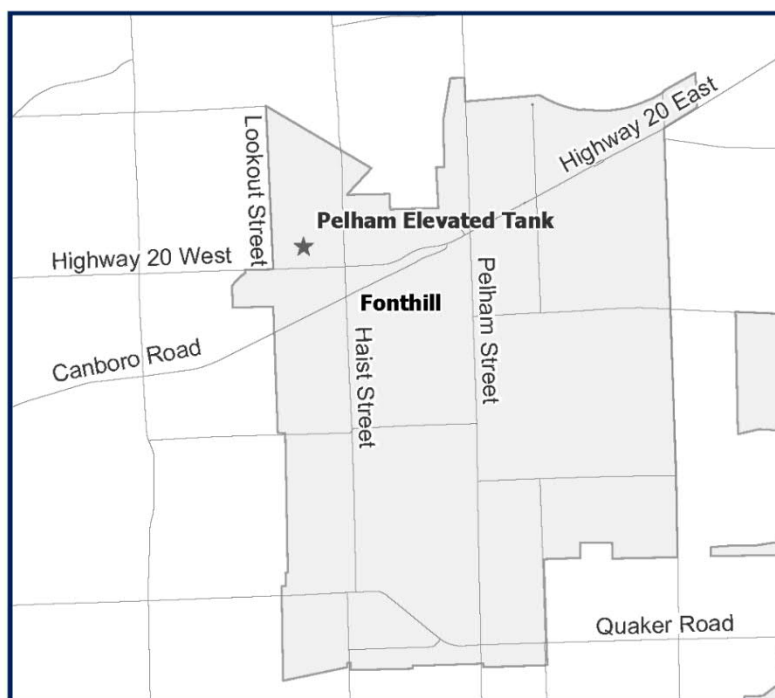

Niagara Region is undertaking a Class Environmental Assessment (Class EA) for a new Pelham Elevated Water Storage Tank and transmission system upgrades.

Niagara Region recently updated its Water and Wastewater Master Servicing Plan, and this project is part of the recommended improvements to the Pelham water system. The purpose of the study is to address adequate storage, pressure, and capacity to support growth.

The study will follow the Schedule 'B' Municipal Class EA process as set out by the Municipal Engineers Association (October 2000 amended in 2007, 2011 and 2015).

Niagara Region will be considering and evaluating suitable sites within the Town of Pelham for the construction of a new elevated water storage tank. The Region will look at the existing water system to identify any necessary improvements and impacts that the construction of the tank may have on all potential sites.

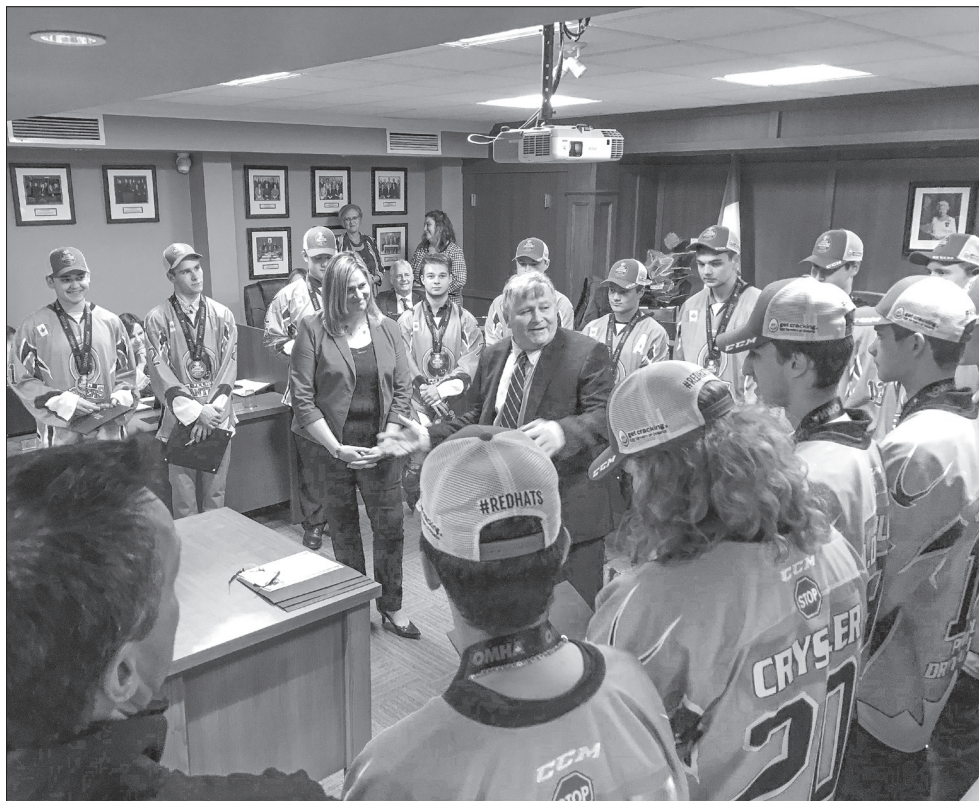

Public consultation is critical to the success of the study. We welcome your comments and will provide opportunities for your input throughout the study. There will be a Public Information Centre (PIC) scheduled for fall 2019 to share information, obtain your input and respond to questions. Further details on the upcoming PIC will be provided as the project progresses. The project is planned to be completed in February 2020.

Should you have any questions or concerns, please contact one of the following project team members:

TOWN COUNCIL NEWS

Old arena can kicked down the road

Planned debate over Haist Street property pushed back again

BY JOHN CHICK
Special to the VOICE

An in camera agenda item at Pelham Town Council never saw the (closed) light of day at the May 6 Committee of the Whole meeting, after members voted to push it back to a special closed meeting to have occurred this past Monday, May 13, as the Voice went to press.

The issue centred around the future of the old arena property on Haist Street. That was clear based on the resolution's description, which cited, in part, "proposed or pending acquisition or disposition of land by the municipality."

Councilor John Wink excused himself from the vote on the motion to postpone. Wink has asserted that he has a conflict of interest on the matter, given that he owns property near the 1120 Haist location. With Wink out of the room, council voted to postpone.

It's been almost two months since council surprisingly voted not to sell the old arena, going against the overwhelming results of both municipal and Voice of Pelham opinion polls. The Town has since commissioned a report on the future of the property.

Prior to the Committee of the Whole, council met in regular session. That meeting was highlighted by two issues that have become contentious: Gypsy moth spraying, and the debate about whether to rebuild the arches over Pelham Town Square.

Mayor Marvin Junkin fired back at the narrative that the Town has been historically negligent in spraying for gypsy moths, which, over time, can effectively kill trees.

"You do not spray every year for this, because the [Ontario Ministry of Natural Resources] would not allow you to spray unless

the infestation has reached a certain level," Junkin said. "We would never have got the approval from the MNR to go out and spray if the infestation level was not high enough. To say that we should be [budgeting] \$100,000 a year, and spray for the next 10 years, that is totally false. There are a lot of misconceptions floating around."

The words were clearly targeted at landowners Frank Feeley and Graham Ashdown, whose properties back onto frequently infested Hillcrest Park in Fonthill. The pair have been vocal in their criticism of the Town's perceived inaction over the years. Hillcrest Park has been sprayed just twice since 2009.

As a result, Ward 2 Councilor Ron Kore wants to make amends with property owners like Feeley and Ashdown by covering their costs for this spring's planned aerial spray. He pushed back on Junkin's assertion.

"The infestation [on properties near Hillcrest Park] is just unbelievable," Kore said. "I would say we're responsible for that, because we did not do our jobs."

Junkin interjected: "I'm just saying telling you what the expert said." Kore retorted, "Tell the expert to come to come to Fonthill and see the residents. Last year we spent \$7,000 on spraying, and I don't think that was good enough."

With that, council voted on a bylaw to "respect the gypsy moth," but the matter wasn't done there. In committee, cost recovery options of the spray program—currently scheduled for later this month and early June—were discussed.

Councilor Mike Cioffi took issue with the higher cost that rural property owners will assume as compared to those in the "urban" zone inside Fonthill.

However, Public Works director Jason Marr said the Town has no involvement in the spraying of rural properties, and that this aspect is being fully coordinated by contractors Trees Unlimited and Zimmer Air. He added that the average price per acre is actually lower in the rural zone, given the larger size of many of the properties, and the fact that unlike over Fonthill, where helicopters are necessary, a fixed-wing aircraft can be used to spray. According to Town statistics, the average lot in the urban zone is less than 0.3 acres.

Cioffi shot back, asking if Trees Unlimited and Zimmer Air's contract was acquired via protocol-based RFP.

When told no, Cioffi scoffed, "Good business to be in."

The urban spray is budgeted at \$63,000. The average price per property owner is anticipated to be between \$225 and \$275.

Kore again made the case for the Town to pick up some of the tab, specifically with landowners like Feeley and Ashdown—whose properties back onto a publicly owned trouble spot.

"What I'm asking is we pick up the bill for those who back onto our parks," he said. "I personally think we own it. I was shocked to see the infestation on these trees. We need to find money. We can budget so we don't have this dissent."

Council ordered staff to report back on alternative financing options to cover the costs of spraying all Pelham locations.

THINK SPRING!

FENWICK UNITED CHURCH'S

ANNUAL PERENNIAL PLANT & BAKE SALE

Saturday, May 18, 2019
8:00 am - 12:00 pm

In the Church Parking Lot & Church Hall
1050 Church Street, Fenwick

Come early and enjoy
the selection of perennials
that will enhance your garden
for years to come.

Then come to the church hall for a coffee and muffin
and buy some fresh baked goodies to enjoy!

SEEDS

continued from previous page

tifications being offered by the sponsoring parties, it appears that no value will be created for either farmers or taxpayers, but that value certainly will be captured by the seed companies. As for who that value is extracted from—it will inevitably come from farmers.

Fortunately, this story is far from over, and its ending has not yet been written. Farmers must now take all available opportunities, whether at farm shows, commodity group meetings or the AAFC consultation process, to ensure farmers' right to save and use their own seed is upheld.

Cam Goff

NOTICE OF PUBLIC INFORMATION CENTRE

Pelham Elevated Tank Municipal Class Environmental Assessment and Enhanced Conceptual Design

Niagara Region is undertaking a Class Environmental Assessment (Class EA) for a new Pelham Elevated Water Storage Tank and transmission system upgrades. This project is part of the recommended improvements from the recent Water and Wastewater Master Servicing Plan to the Pelham Water System. The purpose of the study is to address adequate storage, pressure, and capacity to support growth.

The study follows the Schedule 'B' Municipal Class EA process as set out by the Municipal Engineers Association (October 2000 amended in 2007, 2011 and 2015).

Project Status

Niagara Region has reviewed the existing water system, considered and evaluated suitable sites within the Town of Pelham for the construction of a new elevated water storage tank, and necessary improvements to the existing water system.

Public Information Centre (PIC)

We invite you to attend the PIC to view the displays and provide comments. The PIC is scheduled for:

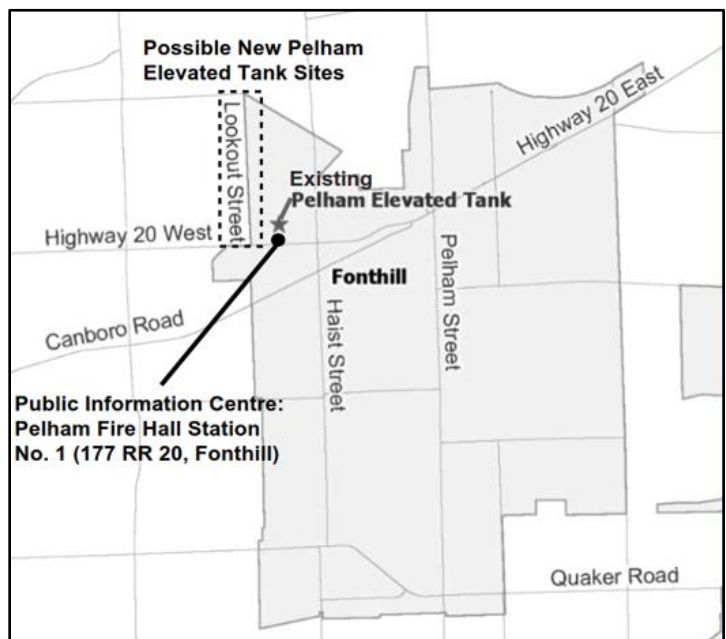

Date: Wednesday, Nov. 6, 2019
Time: 6 - 8 p.m.
Location: Pelham Fire Station No. 1
 177 RR 20 W
 Fonthill, ON

The PIC will provide an overview of the Class EA process, the existing improvements that need to be addressed, potential sites that were considered for a new elevated water storage tank, and evaluation of the shortlisted sites.

Public consultation is critical to the success of the study. We encourage any interested parties to get involved and provide input. Should you have any questions or concerns, please contact one of the following project team members:

PUBLIC NOTICE

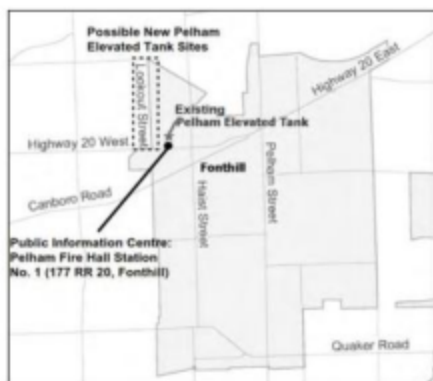

NOTICE OF PUBLIC INFORMATION CENTRE Pelham Elevated Tank Municipal Class Environmental Assessment and Enhanced Conceptual Design

Niagara Region is undertaking a Class Environmental Assessment (Class EA) for a new Pelham Elevated Water Storage Tank and transmission system upgrades. This project is part of the recommended improvements from the recent Water and Wastewater Master Servicing Plan to the Pelham Water System. The purpose of the study is to address adequate storage, pressure, and capacity to support growth.

The study follows the Schedule 'B' Municipal Class EA process as set out by the Municipal Engineers Association (October 2000 amended in 2007, 2011 and 2015).

Project Status

Niagara Region has reviewed the existing water system, considered and evaluated suitable sites within the Town of Pelham for the construction of a new elevated water storage tank, and necessary improvements to the existing water system.

HUSON

continued from previous page

we call this an "unintended consequence." Unintended consequences are results of poor decisions that have a negative impact on other agricultural sectors and communities.

Two examples of this include the loss of valuable farmland to the Cherry Ridge Development and the Foss Road/Welland Road corridor, and all the surrounding non-agricultural development in these areas. It is getting very tough for farmers of all types to grow profitable businesses in Pelham. So, they sell out. Can't blame them for that. This is how the cannabis industry slipped in. Can't blame them either. Can't blame the residents who are complaining, who now reside in these beautiful

homes in these developments and suffer the consequences. But we can blame the history of poor planning due to lack of agricultural education. We do not want history to repeat itself. Are intentions to preserve farmland for farming or for housing? If we want farming, then push for incentives to keep farms viable, profitable and in place to be passed on to the next generation. Do not force them out of business with unreasonable planning tactics or unintended conclusions!

The greenhouse industry in the Niagara region consists of dedicated farmers who produce healthy and vegetables for our tables, flowers and plants for enjoyment in our homes and gardens, flowers and plants for our mental health and well-being, perennial flowers, trees and shrubs for our pollinators and carbon ab-

soption from the environment. The greenhouse industry is owned and operated by families who contribute to the communities we reside in. We are suppliers to a landscape industry that beautifies our homes, businesses and communities. We have a long history of being good neighbours and businesses that communities are proud of. This industry is going to grow as a result of retailers demanding these products. We travel the world so as to adapt the latest technologies that help us stay current and good stewards of the land. Ms. Huson makes no mention of this in her commentary. She did not include any economic facts, land yield facts or statistics. She actually threw us under the bus with her claim that valuable farmland is lost as a result of paving over the land to build greenhouses. Ms. Huson, please look outside your window and pay attention to what was paved over and what was built. In case you do not see it, the loss of farmland is to urban development. Pelham lost some of its best farmland to urban development. Look closely at every surrounding municipality and you will see exactly the same farmland consumption as a result of urban development.

So, Ms. Huson needs to do her homework, get her numbers right and then go forward and try to address the problems. She is right that it is going to take proper education to solve the problems of chaos on the cannabis issue. It also takes cooperation. She has to practice this educational process first before she can start preaching.

And by the way, we do have proper methods to preserve precious farmlands. We call it Agricultural Zoning! This Agricultural Zoning accommodates all farming entities as described in the Farming Food Production Protection Act. This act is in place so that no discrimination is executed either intentionally or unintentionally. There are processes and examples from the Ontario Ministry of Agriculture and Food that can be adapted for coexistence of these agricultural entities.

Yes, the cannabis issue has caused a lot of rhetoric and hard feelings as a result of the way these businesses snuck into our communities. The cause is poor education, poor planning and poor cooperation from some of the cannabis players. It would be better to invite the Region to our municipal meetings where we already have a committee addressing this serious cannabis issue in an educated and cooperative manner.

As our Regional Councillor, the Pelham Cannabis Control Committee is a great place for your educational process to start. You will not be disappointed! We are very willing to help share information in any way we can. Education from experience is a very powerful tool. Let's not waste time with more rhetoric and more committees.

Let's get the facts right and get the job done quickly so people who are most affected can get on with their lives and literally take a deep breath of relief.

WELLS OF HOPE COLLECTING DONATIONS FOR GUATEMALANS DISPLACED BY VOLCANO

Wells of Hope is inviting people to a barbecue being held over three days this week to collect donations for Guatemalans displaced by a volcano.

For the past 15 years, the Niagara-based charity has been drilling water wells in the Central American country, completing 27 that have benefited more than 80,000 people in the regions of Jalapa and Jutiapa.

This year, Wells of Hope partnered with Cambridge-based Ontario Gleaners, which donated more than 10,000 pounds of dehydrated soup for families displaced by a volcano eruption last summer.

Wells of Hope has a 40-foot sea container it is hoping to fill and is asking people to come to the barbecue at Safe Stor Records Management property at 2704 Highway 20 in Fonthill, Friday through Sunday from 10 a.m. to 3 p.m. The organization is collecting used and new bicycles, sewing machines, shovels, picks, small hand tools, laptops, walkers and canes.

Wells of Hope is also accepting donations through its website wellssofhope.com.

For more information, contact Ben at 905-932-3003 or water@wellssofhope.com.

NOTICE OF DISPLAY BOARD POSTING

From Pelham Elevated Tank Class Environmental Assessment Public Information Centre

Further to the Pelham Elevated Tank Public Information Centre that was held on Wednesday, November 6, 2019, the display boards and comment sheet from the meeting are available on the following websites:

Region of Niagara website:

<https://www.niagararegion.ca/projects/pelham-elevated-tank/default.aspx>

Town of Pelham website:

<https://www.pelham.ca/en/news/pelham-elevated-tank-environmental-assessment-update.aspx>

The display boards provide an overview of the Class EA process, the existing improvements that need to be addressed, potential sites that are being considered for a new elevated water storage tank, and evaluation of the shortlisted sites.

Public consultation is important for the success of the study. We encourage any interested parties to provide input. We would appreciate your comments by December 4, 2019, as we are preparing for a second Public Information Centre early 2020. This is to provide an update based on the comments received and further findings. Another project notice will be issued in the future to provide further details.

Should you have any questions or concerns, please contact one of the following project team members:

Rika Law, P.Eng, PMP®
Project Manager and Associate
R.V. Anderson Associates Limited
43 Church St., Suite 104
St. Catharines, ON, L2R 7E1

Toll-Free: 1-800-263-7215
Fax: 905-685-5205
Michelle.Miller@niagararegion.ca

Personal information collected at public meetings or submitted in writing is collected under the authority of the Municipal Act, 2001, and will be used by members of Regional Council and Regional staff. The written submissions including names and contact information and the report of the public meeting will be made available to the public. Questions should be referred to Anne-Marie Norio, Regional Clerk at 905-980-6000, ext. 3220.

*If you require any accommodations for a disability in order to attend and participate in meetings or events, please let us know in advance so that arrangements can be made in a timely manner. Please contact the **Accessibility Advisory Coordinator** at 905-980-6000 ext. 3252 or accessibility@niagararegion.ca.*

If you have limited access to a computer/internet and wish to obtain a hardcopy of the display boards instead, please make the request to Ms. Rika Law via the contact methods noted above.

This notice was first issued on November 19, 2019.

Notice of Public Information Center No. 2

Pelham Elevated Tank Municipal Class Environmental Assessment and Enhanced Conceptual Design

Niagara Region is undertaking a Class Environmental Assessment for a new Pelham Elevated Water Storage Tank and transmission system upgrades. This project is part of the recommended improvements from the Water and Wastewater Master Servicing Plan to the Pelham Service Area of the Welland Water System. The purpose of the study is to address adequate storage, pressure, and capacity to support growth. The study follows the Schedule 'B' Municipal Class Environmental Assessment process as set out by the Municipal Engineers Association (October 2000 amended in 2007, 2011 and 2015).

The new Pelham Elevated Water Storage Tank is an important project to both the community and Niagara Region. We heard your comments at the Nov. 2019 Public Information Center (PIC) for additional consultation and review of the potential sites for the new elevated water storage tank. Based on this, the Project Team has reconsidered and re-evaluated suitable sites within the Town of Pelham for the construction of a new elevated water storage tank and the necessary improvements to the existing water system and identified a recommended solution.

Map of Area Evaluated for Possible Elevated Tank Sites

MOVING WATER FORWARD

Starting on Aug. 31, 2021, project presentation, information and comment forms can be found on Niagara Region's website: niagararegion.ca/projects/pelham-elevated-tank/

We invite you to view the virtual PIC presentation and provide comments.

Virtual Public Information Centre Timeline

Tuesday, Aug. 31, 2021: Project information, project overview video, and transcript posted on Niagara Region's website.

Aug. 31 to Sept. 14, 2021: Submit questions or comments via the online form.

Sept. 28, 2021: Responses to questions and comments will be posted to the website.

The virtual Public Information Center provides an introduction and overview of the Class Environmental Assessment process, the existing improvements that need to be addressed, potential sites that were considered for a new elevated water storage tank, and evaluation of the shortlisted sites.

Public consultation is critical to the success of the study, and we encourage any interested parties to provide input by contacting one of the project team members.

Personal information collected or submitted in writing at public meetings will be collected, used and disclosed by members of Regional Council and Regional staff in accordance with the Municipal Freedom of Information and Protection of Privacy Act (MFIPPA). The written submissions including names, contact information and reports of the public meeting will be made available. Questions should be referred to the Privacy Office at 905-980-6000 ext. 3779 or FOI@niagararegion.ca.

If you require any accommodations for a disability in order to attend and participate in meetings or events, please let us know in advance so that arrangements can be made in a timely manner. Please contact the Accessibility Advisory Coordinator at 905- 980-6000 ext. 3252 or accessibility@niagararegion.ca.

New Pelham Elevated Tank Environmental Assessment

[All Niagara Region projects](#)

About the Project

Niagara Region is undertaking a Schedule B Municipal Class Environmental Assessment to evaluate the future needs and find the preferred solutions to meet these needs as well as optimize the system. The new elevated tank is planned to be constructed by 2022.

Once the new Pelham elevated tank is commissioned, the existing tank will be decommissioned.
